Research interests include Electronic Commerce, Strategic Information Systems, EDI and Interorganizational Systems, Cross-Cultural Issues in IS, and the Management of Emerging Technologies.

CO-PROJECT LEADER, GLOBALTEXT PROJECT 2006 to Present

The Global Text Project is engaging the worldwide academic and practitioner communities in the development of free open-content textbooks in all undergraduate university disciplines targeted at students in the developing world. The proof of concept phase of the project, now underway, will produce two textbooks using modified wiki software. Other members of the core team are from the University of Georgia, Ohio University, and Universidad de Concepción, University of Passau and the University of Washington. More information on Globaltext is available at <http://globaltext.org>.

DIRECTOR, CENTER FOR THE STUDY OF ELECTRONIC COMMERCE 1995-2006

Established in March 1995, the Center had a dual mission of research and education in the domains of EDI and Electronic Commerce. Cross-disciplinary by design, the Center undertook projects that had research value to the University and practical value to a collaborating company. It sought to fulfill its mission of education by contributing topics in Electronic Commerce to the curricula of all business academic disciplines and by sponsoring continuing education seminars and symposia.

MEMBER, GEM CONSORTIUM EXECUTIVE BOARD 2000 to 2002

The GEM consortium was an international network of business schools sharing a common curriculum in e-management at the master's degree level. Members of the consortium included:

- Athens University of Economics and Business
- Copenhagen Business School
- Daniels College of Business, University of Denver
- ESADE, Barcelona
- J. Mack Robinson School of Business, Georgia State University
- Monterrey Tech (ITESM), Monterrey, Mexico
- Norwegian School of Economics and Business Administration
- Reykjavik University
- Rotterdam School of Management, Erasmus University
- University of Cologne

The program received the endorsement of the European Commission and G7's Information Technology group.

DIRECTOR, COLORADO ADVANCED SOFTWARE INSTITUTE (CASI) 1991 to 1995

The Daniels College of Business of the University of Denver managed the Colorado Advanced Software Institute (CASI) under contract from the Colorado Advanced Technology Institute (CATI). CASI was a consortium of State businesses and research universities. It promoted economic development through software technology transfer and human resource development and had both research and service components.

CHAIR, DEPARTMENT OF MANAGEMENT INFORMATION SYSTEMS 1984 to 2001

- 1970-1983 Member, Firm-wide Electric and Gas Industry Consulting Group
- 1974-1976 Partner in charge of Firm-wide Financial Planning and Reporting Practice

The initial years in the Management Information Consulting Division were spent in the detailed design and installation of computer-based information systems. Experience progressed from programming through detailed design, functional and technical design, programming supervision, development of user procedures, training, system test and conversion. Later, responsibilities broadened to the point where experience was acquired with management information and general management problems for clients in most major industries in the US as well as in Canada, Europe, Latin America and Africa. Finally, experience was acquired in all

phases of the management of a highly profitable multi-office consulting practice with over 125 professionals in the largest office.
