

SAMUEL HARNISCH

Master's in Finance '21

Product Strategy Analyst,
PIMCO

The professors have a wealth of knowledge and have practiced the subjects they teach. I learned financial modeling from a former hedge fund employee, econometrics from someone who forecasted economies for numerous countries, and active equity portfolio management from the CIO of an investment advisory company. Because of how generous the Daniels professors are with their time, I spent countless hours asking questions before and after class and during their office hours.

I was able to customize my finance courses, pursuing charters, independent research studies and internships while receiving credits towards my degree. I felt incredibly well-rounded and prepared for a career in investments upon graduation.

INVESTMENTS TRACK

Students in this track have a range of opportunities that customizing coursework and experiential activities can facilitate. For example, our investments track students have had internships and jobs in asset management firms, hedge funds, start-up capital enterprises and nonprofit foundations. Deepen your focus in the investments field with courses like financial markets and instruments, advanced portfolio analysis, and sustainable finance. There's even an opportunity to take courses managing student-run funds in our Marsico Investment Center.

Elective courses you can take as part of this track include:

FIN 4320

Equity Analysis

FIN 4330

Portfolio Management & Risk Analysis

FIN 4710

Marsico Investment Fund I

FIN 4720

Marsico Investment Fund II

FIN 4860

Derivatives

FIN 4890

Fixed Income Analysis

Students can also choose from a range of other finance electives. You'll work with an advisor to build a course plan that matches your career goals.
