Bachelor of Science in International Business; December, 2005
Minor in Business Law; December, 2005

RESEARCH:

I adopt a behavioral approach to strategic management research, focusing on how information is construed and conveyed in organizations. My research draws on a variety of theoretical perspectives—including stakeholder theory, institutional theory, and stewardship theory—to examine how firms use information to navigate shifting social evaluations, foster support for organizational change, and build trusting relationships. I use content analysis, set-theoretic methods, and other qualitative and quantitative approaches to study these topics.

REFEREED JOURNAL ARTICLES:
